EDUCATION

Queens College **Expected 2027**
Bachelor of Science in Computer Science Queens, NY
Bronx High School of Science **2020**
High School Bronx, NY

EXPERIENCE

Queens College, CUNY **Sep 2026 - Present**
IT Assistant **Queens, NY**
• Installed 50+ Wi-Fi access points and maintain switches and security cameras across 30+ Queens College buildings
• Grew campus network capacity 10% by installing 10+ switches and patch panels, verified with Fluke LinkIQ and a tone generator

John F. Kennedy International Airport **Sep 2025 - Present**
Customer Experience Specialist **Queens, NY**
• Guide travelers across 12+ transit modes and answer 100+ questions per shift using TripCompare fare and travel-time rankings
• Turned JFK queries into an app adopted by >75% of surveyed passengers by comparing fares and trip times across 12+ modes

PROJECTS

TripCompare NYC | JavaScript, React, Vite, Leaflet, PWA Live | GitHub
• Web app ranking every way from JFK, LGA, and EWR into NYC by cost and time, with verified fares and live MTA alerts
• Mapped transit routes across 3 airports and 14 NYC neighborhoods with Leaflet, verified fare data, and live MTA service alerts
• Enabled trip planning in 2 languages with 2-minute MTA alerts by adding a localized React UI and offline PWA route caching

Crisis Hub | TypeScript, Next.js, Tailwind, Three.js Live | GitHub
• Free, open-source site documenting 52 global humanitarian crises with 3 actions each: donate, amplify, demand change
• Scheduled 1 daily update across 52 crisis pages to surface current reports through ReliefWeb ingestion and GitHub Actions
• Enabled exploration of 52 crisis hotspots with 4K NASA imagery via a Three.js globe, custom shaders and zoom-aware labels

Syllabloom | JavaScript, Python, PostgreSQL, OpenAI API, Stripe, AWS Live | GitHub
• Co-built with a 4-person team: turns lectures, slides, syllabi, and course files into editable, source-linked Anki cards
• Imports DOCX, PDF, and PowerPoint files and generates source-quoted Basic and Cloze cards via OpenAI JSON-schema output
• Syncs class profiles, cards, calendar, and study history across devices with Clerk auth and Neon Postgres, deployed on AWS

Matchbook | Go, Property-Based Testing, GitHub Actions GitHub
• Stock-exchange matching engine in Go that pairs buy and sell orders by price, then arrival time, with partial fills
• Validated 120,000 random operations with 96.8% test coverage through seeded property tests against a naive reference engine
• Sustained 2.08M orders/sec at 0.30μs p50 on 1 thread with 0 locks using price-level heaps and an allocation-free hot path

CERTIFICATIONS

CodePath | Foundations of AI Engineering, Honors (ID 394307) | Spring 2026
CodePath | Certification in Cybersecurity (ID 300215) | May 2025

TECHNICAL SKILLS

Languages: JavaScript/TypeScript, Python, Go, Java, SQL, HTML/CSS, Bash
Web: React, Next.js, Vite, Tailwind, Three.js, Node.js, FastAPI, REST APIs, PWA
Cloud & Data: PostgreSQL, SQLite, Docker, Kubernetes, AWS, GitHub Actions CI/CD, GitHub Pages
Testing & Practices: pytest, Playwright, property-based testing, Git, code review, Agile, Claude Agent SDK, OpenAI API
